

Wayne Helix™ 2000 fuel dispenser with Super Plus Capacity

We are excited to introduce a new addition to the Helix™ dispenser family. The Helix™ 2000 Super Plus Capacity presents a great opportunity to tap into the high speed segment with the ability to deliver up to 180 LPM (litres per minute).

The Helix™ 2000 dispenser Super Plus Capacity features Wayne's standard global components in a new set-up with larger tubes, hose connections and hanging hardware to allow for the higher flow. It is available for one grade only, with one nozzle at 180 LPM and an alternative to add a second nozzle at 70 LPM. The first release is for a suction dispenser only, but as opportunities arise, a version for remote dispensers and additional models with satellite output are also planned. The Super Plus Capacity model is also the first model within the Helix™ dispenser family to feature our next generation of piston meter, the

Wayne iMeter™2 fuel meter, which we will see rolled out across the complete Helix™ dispenser range later this year. Keep an eye open for more details on the subject.
